ABOUT ME

I am eager to contribute to a dynamic and forward-thinking team dedicated to driving organizational growth and success. My goal is to leverage my skills and expand my potential by embracing meaningful challenges that foster professional development. With a strong desire to add value, I seek an environment where I can make a significant impact and grow as a vital asset to the company.

APP DEVELOPMENT

Advanced Restaurant Booking Application Development

- Created a structured API with the MVC framework to facilitate smooth data communication and manage backend operations.
- Developed a cross-platform mobile application in React Native, providing a responsive and seamless user experience for both iOS and Android platforms, tailored for advanced restaurant booking functionality.

Smart Tech

Apr 2022 - Jun 2022
Islamabad

WEB DEVELOPER

I have experience in developing a range of static websites, implementing basic CRUD operations in desktop applications, and creating dynamic web forms integrated with SQL Server databases. Additionally, I have contributed to a client-based software project, handling various requirements and functionalities tailored to client needs.

SOFTWARE DEVELOPER

Desktop Application for Cash & Carry, Shops, and Stores

- Developed over a *6-month period* to support retail operations.
- Integrated key modules, including:
 1. Sales and Purchases: Enabled transaction tracking and inventory management.
 2. Expenses and Banking: Facilitated financial management, handling expenses and bank reconciliation.
 3. Employee Registration: Managed employee profiles and tracking.
 4. Reporting and Ledgers: Produced reports and maintained ledgers using RDLC for reporting.

KP Government e-Bidding Platform (KRRRA)

- Contributed to a web application project for the KP Government's e-bidding platform.
- Project duration: 10 months.
- Implemented major modules:
 1. Admin Module: Centralized control for platform management.
 2. Vendors Module: Enabled vendor registration and bidding.
 3. Entities Module: Managed public and private entities in the platform.
 4. E-commerce Web Application for Paint Dealers

Worked on a 7-month project using MVC architecture.

- Designed and developed specific modules for:
 1. Normal Users and Registered Users: Created distinct interfaces and functionalities for general and logged-in users.
 2. Admin and Agents: Managed administrative tasks and agent-specific operations for streamlined workflows.

REFERENCE

REQUIRED ON DEMAND

API Development in Entity Framework for Flutter Application

- Built API services for a Flutter-based application within a 3-month timeline.
- Designed to serve both user and agent functionalities.
- Developed an admin panel for backend management.
- Static Website Development for Various Clients

Crafted and launched over five static websites using WordPress for diverse clients.

- Project span: 4 months.
- Emphasized responsive design and client customization for a range of industry needs.

SOFTWARE DEVELOPER

Multi-Module Portal Development and Maintenance

- Created and managed a portal using MVC Core, featuring modules for:
 1. Administration: Centralized management for streamlined operations.
 2. Networking: Enhanced communication and information sharing across departments.
 3. Sales: Improved sales efficiency with a dedicated sales panel.
 4. Finance and Other Departments: Integrated support for financial and departmental needs.
 5. Optimized the sales operations, making the sales panel more effective and responsive to user needs.
 6. Developed a robust networking module to facilitate smoother collaboration across teams.

Design of 50+ Static Websites Using Bootstrap

- Utilized Bootstrap to create over 50 user-friendly, responsive static websites, ensuring consistency and ease of navigation for end-users.
